Hello,

I'd be happy to help update and verify your database of 100 leads. Accuracy and clean data are very important, and I have strong experience in this area.

In my previous projects, I've:

* Collected and verified business contact details (emails, phone numbers, websites) through web scraping and research.

* Cleaned and updated datasets in Excel and CSV, ensuring data consistency and correctness.

* Worked on database projects in Microsoft Access, where I built and maintained customer and supplier records.

I will carefully review each lead in your list, confirm and update the contact information, and deliver a clean, accurate, and ready-to-use database.

Let me know if you'd like me to start right away—I can complete this task quickly with a high level of detail.

Best regards,

Tadrous William
